- 3/8" and 1/2" glass applications
- up to 37" wide door
- up to 110 lbs.
- 18" ladder pull standard
- up to 240" runnin rail (cut to size and pre-drilled with adjustable inserts)
- SealPro Glass Sealant Available

HYDROSLIDE SERIES

The European “All Glass” Look

- Hydroslide Sliding Shower Door Kits were designed for full standing showers or above bathtubs. The Hydroslide System can accommodate a wide range of shower designs with fixed glass panels on either end, or both sides at 90 or 180 degrees. The Hydroslide System also accommodates the option of floor-to-ceilng glass panels with a sliding door. Hydroslide Sliding Shower Door Kits feature the latest European ‘all-glass’ look.
- The 180 Degree Wall-to-Wall Installation only requires the 180 Degree Standard Kit for the installation.
- The 90 Degree Wall-to-Glass Installation requires the 180 Degree Standard Kit, plus the 90 Degree Wall-to-Glass Accessory Kit. Individual or replacement parts can also be ordered from the next page. Hydroslide Kits come in four finishes: Chrome Fittings with a Brite Anodized Sliding Track, Polished Brass with a Brite Gold Anodized Sliding Track, Brushed Nickel with Brushed Nickel Anodized Sliding Track, and Oil Rubbed

SERENITY SERIES

The Floating Glass Shower Enclosure

Our NEW Serenity Series Sliding Door System has an entirely different look from traditional sliding shower door systems. The use of minimal hardware provides a frameless look that gives the enclosure an almost floating appearance. Specially designed roller bearings allow for quiet, easy opening and closing of the door. This unique roller system operates above the header bar that spans the top of the enclosure.

One sliding and one fixed panel make the 180 Degree Standard Kit beautiful and practical. The Kit includes all items pictured at bottom right of the page, with the exception of the 90 Degree Accessory Kit, which is purchased separately (see bottom left of page). The durable polished or brushed stainless steel units will work with 5/16" or 3/8" (8 or 10 mm) thick tempered glass (not included).

- **SPECIFICATIONS:**

Glass Thickness Range: 5/16" or 3/8" (8 or 10 mm) Tempered Safety Glass (Not Included)

Material: Stainless Steel Only. Chrome, Brushed Nickel & Matte Black Finishes

CAMBRIDGE BYPASS SERIES

The Barn Style Bypass Shower Enclosure

The Cambridge Series enclosure has the same clean design as the Serenity Series but with a double header and dual operating bypass panels. The use of minimal hardware provides a frameless look that gives the enclosure an almost floating appearance. Specially designed roller bearings allow for quiet and easy opening and closing of the door. Dual sliding panels make the Cambridge Series both practical and beautiful.

- 3/8" glass with brilliant polished edges
- Dual rectangular stainless steel header
- External mounted anti-jump roller design
- Both panels have full bypass operation
- Adjustable open door stop for both panels

ESSENCE SERIES

Headerless Barn Style Shower Enclosure

- Our NEW Essence Series allows a headerless appearance by utilizing a bottom rolling system that includes an anti-derail/anti-pinch guard feature. The bottom rollers also have an integrated height adjustment for door to vertical jamb alignment. By being completely header-free, a frameless vertical and horizontal appearance is achieved. Smooth and quiet operation of the door is the cornerstone of this bottom rolling unit.
- With your separate addition of a free standing shower head and valves, new configurations are possible, such as beautiful island designs, U-shaped designs, and L-shaped designs with unconventionally placed plumbing walls.
- The Essence Series Frameless Sliding Shower Door System is for use only with 1/2" (12 mm) thick tempered safety glass (not included). It is stocked in four popular finishes, with a choice of rounded or square corner rollers.
- Sold in a Basic Kit that allows both 180 degree and 90 degree installations, the user simply orders the necessary Brackets, and Handle or Knob separately to complete the installation

FRAMELESS INLINE SERIES

Opens Up the Bathroom Visually

- Inline frameless glass shower enclosures opens up the room visually. An inline frameless shower is comprised of a shower opening that has three walls and one “inline” opening space. Any combination of glass doors and panels used to enclose the shower space will be fixed side-by-side (or at 180 degrees).
- There are many types of inline frameless glass shower enclosures. The most common is the Fixed panel and a door attached to a wall combination, especially for contractor-grade bathrooms. You can be as creative as you want with your custom made shower enclosure. Since we create your glass from start to finish in house, we have the flexibility to build your creativity.
- Many finishes available. The most common finishes are Brushed Nickel, Oil-Rubbed Bronze and Chrome
- Clips and U-Channel Options available with 8” handle.

NEO-ANGLE SERIES

Creative Problem-Solving for Corner Showers.

- The Neo frameless shower door complements an angular bathroom space by utilizing our state-of-the-art measuring, designing and fabricating techniques. If your stylish, space-saving corner shower is in need of that final touch, our Neo frameless shower doors will brilliantly and instantly turn your bathroom into a show stopper.
- By custom tailoring your angular shower, it will be transformed into a one-of-a-kind centerpiece.
- The neo angle design adds pizzazz with a designer look and a touch of creative problem-solving for corner showers. A neo angle, or diamond-shaped, shower has three glass sides enclosing two walls. And is most often used as a stylish, space-saving corner shower. Instead of squaring off two glass panels to build out a corner shower, the neo angle design typically includes a glass door placed across from the inner corner of the shower. Then two glass panels on either side of the door return to each wall at 135 degree angle.
- The return panels may sit atop one or two half-walls. You tell us what you want and we can custom create it.

FRAMELESS SINGLE DOOR

Simple. Sleek. Custom Frameless Beauty.

- Many people go wrong with this type of shower door. They get the framed glass door. The frame around that glass is bulky and draws the attention from the actual beauty of the bathroom. Having a frameless single glass door for your shower enclosure will change the appearance of your bathroom from ordinary to extraordinary.
- Don't fall in the trap of that framed door, go frameless. Our frameless single glass shower doors are custom made to fit the space in your bathroom. Vitralum has trained our glaziers to create perfection in your frameless glass door. This door will fit just right in the space given.
- Brushed Nickel, Chrome and Oil-Rubbed Bronze Finishes available with 8" Back to Back Handle.

SHOWER SPLASH PANEL

Style. Functional. Easy Shower Access

- Why bother with the hassle of a door? Sometimes all you need is a single panel to enhance and beautify your bathroom. This panel will not only enhance the visual appeal to your bathroom, it is functional and allows for easy shower access.
- These panel doors are a great way to simply and style and class to your bathroom.
- Many Finishes available. The most common finishes are Brushed Nickel, Chrome and Oil-Rubbed Bronze
- Radius splash guards are available and have 3 touched corners and one 10" radius corner

BYPASS SERIES

The Solution for Tight Spaces.

- Do you need a solution for your shower that is in a tight space? We can solve this for you with our bypass shower doors. These shower doors are practical solutions for tight spaces. They will slide easily and also come with great towel bar handles. The room that you save in your bathroom with the sliding shower doors will give your bathroom that crisper feel which you are looking for.
- These elegantly designed frameless sliders are practical and classy. Keep that space sharp with frameless glass
- Available in Brushed Nickel, Chrome and Oil-Rubbed Bronze Finishes.
- ¼" and ⅜" thick glass available

SEMI-FRAMELESS SERIES

Euro Style Rounded Header

- Designed to meet the demands of both style and affordability, our Style Series swing shower doors feature 1/4" frame-less glass with a full-length, continuous, concealed hinge.
